

## CONSERVATION TECHNOLOGY

# I.P.G

Geomagnetic polarity reverser

### TREATING

CAPILLARY RISE  
AT IT'S SOURCE

**Conservation Technology** provides a unique system to get rid of humidity in walls: **I.P.G.** (Geomagnetic Polarity Reverser)

Our system utilises IPG to stop capillary rise in buildings with a target range of 10, 20 & 30 meters in diameter.

Treating capillary rise at its origin

up to  
**25%**  
SAVINGS  
on your energy bill

**30 years**  
MANUFACTURERS  
GUARANTEE\*

recognized  
effectiveness

## CONSERVATION TECHNOLOGY

### WHY CHOOSE

#### CONSERVATION TECHNOLOGY ?

We get rid of humidity in walls thanks to our revolutionary system. It uses electromagnetic fields to **inverse the polarity of water molecules and stops capillary rise.**

**Walls Naturally dry out by evaporation between 18 to 36 months. I.P.G. is composed of passive circuits.** It does not require batteries or need to be plugged in. Thanks to our extensive range, **it treats the entire building.**

### ELIMINATE HUMIDITY

WITHOUT RISK !

Easy to install,  
without noise  
or dust

Not harmful  
to one's health  
(certified Product)

Treats the source  
of the problem  
(rising humidity)

The cost of heating  
is reduced

Increases the  
value  
of your house

Efficient results

Economical process  
to get rid of humidity

Doesn't need  
power or battery

### OUR DIFFERENT RANGES

**I.P.G.<sup>10</sup>**  
10 METER IN DIAMETER

**I.P.G.<sup>20</sup>**  
20 METER IN DIAMETER

**I.P.G.<sup>30</sup>**  
30 METER IN DIAMETER
