

TARSOLVE

INDUSTRIAL TAR AND BITUMEN REMOVER

Description:

TarSolve has been specifically formulated for the building and construction industry. The modern tar and bitumen remover from brickwork and concrete.

TarSolve effectively, safely and completely removes Tar, bitumen and bituminous compounds from brickwork, concrete, terrazzo, marble and stone surfaces. TarSolve eliminates the problems which occur on all building and overspray.

TarSolve tar remover totally replaces other existing products which can cause or leave permanent staining and eliminates the need to cut out and replace expensive brickwork and concrete.

Application of Use:

TarSolve bitumen remover is safe on brickwork, concrete, terrazzo, marble, stone surfaces and most metals and is also effective in removing glue and most adhesives. Easy to use, simple spray on and agitate with a brush and rinse off with water.

Directions of Use:

To prepare the surface, first wet the wall with water to take up absorbency. Spray TarSolve on the wall and begin to agitate it with a stiff brush. You will begin to see fizzing on the surface. Leave on for approximately 12-20mins and then rinse off with lots of water. If heavy soiling, repeat process if necessary.
